

The Scope 3 Execution Gap

In agriculture, Scope 3 reporting succeeds or fails at the last mile — where data, practices, and verification meet the field.

01 • WHERE THE GAP IS

Emissions originate upstream — in fertilizer, tillage, and crop practices. Reporting happens downstream — in ERP and disclosure systems. The connective tissue is missing.

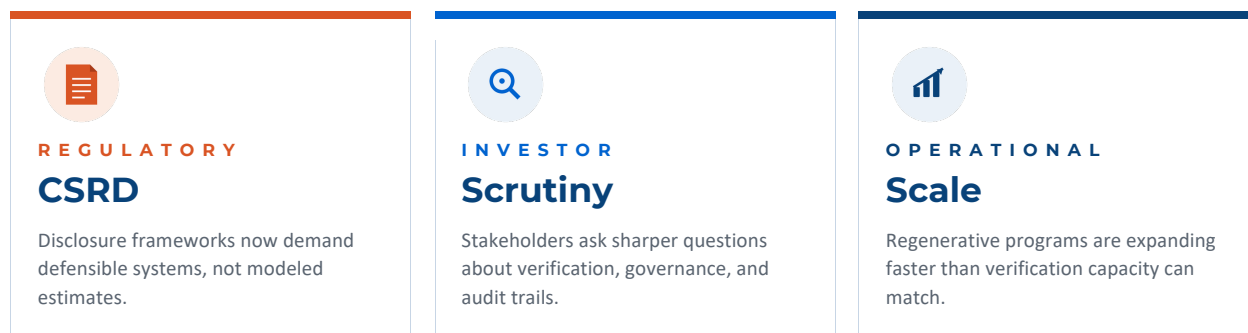

WHERE SCOPE 3 BREAKS

Data, practices, and verification never reach enterprise reporting intact.

02 • WHY THIS MATTERS NOW

Three pressures are reshaping what counts as defensible Scope 3 reporting — and they reward organizations that act before scrutiny arrives.

THE SHIFT

From reporting exercise to governed infrastructure.

Credibility now depends on coordinated systems, not isolated tools.

03 · HOW CORVIAN CLOSES THE GAP

An enterprise platform, already operating at scale

Corvian connects regenerative agriculture programs to verified, audit-ready Scope 3 reporting through four integrated pillars:

 Grower Enablement Onboarding, telemetry, full-season monitoring	 Embedded CI Scoring Carbon intensity modeling & regen frameworks	 Audit-Ready Data Serialized, traceable, third-party validated	 Enterprise Integration APIs to ERP, procurement & reporting systems
--	---	---	--

04 · WHAT CHANGES

From exposure to defensibility

TODAY	WITH CORVIAN
✗ Modeled estimates and supplier surveys	✓ Verified, field-level data tied to specific operations
✗ Spreadsheets and disconnected platforms	✓ One governed, interoperable enterprise platform
✗ Annual snapshots	✓ Continuous monitoring and agronomic signals
✗ Sustainability claims based on assumptions	✓ Sustainability claims supported by traceable evidence

BUILT FOR ENTERPRISE SCALE

100M+

ACRES

Field-level data · ~50× California

20+

YEARS

Digital agronomy · 15+ years in regen ag

>95%

ACCURACY

Validated phenology models, corn & soy

36

AGTECH PATENTS

Proprietary agricultural intelligence

TSX: FFH

BACKED BY FAIRFAX FINANCIAL

Multi-year continuity & stability

7M+

SOIL TESTS

Dedicated labs, validated data

ERP

ENTERPRISE-READY

APIs, integration, fully managed

Move toward defensible Scope 3 reporting.

Schedule a working review of your current systems and data readiness.
