

CAN YOU ANSWER THIS?

Can you verify Scope 3 all the way to the field?

Your sourcing network's field-level data in one system.

Most MRV platforms measure results, but they don't connect the field-level data needed to run a Scope 3 Program. Corvian connects suppliers, growers and field-level evidence so you can verify Scope 3 progress at its source.

GROWERS

Access to program funding, simpler enrollment and support for implementing verified field practices.

SUPPLIER

Scalable program capability, access to buyer funding & buyer-ready evidence across your grower network

CPG

Sourcing visibility, verified field evidence and scalable execution across your supplier and grower network.

Can you answer these Scope 3 questions?

Corvian brings telematics, operational, agronomic and soil data together in one connected program. We have a proven system to onboard growers, replace manual data collection and validate Scope 3 outcomes. With dedicated soil labs, patented technology, and over 20 years in the field, we know how to collect and manage ag data like no one else. **The result is auditable evidence tied to specific farms, fields and practices for both suppliers and CPGs.**

FOR CPGs

FROM COMMITMENT TO VERIFIED EVIDENCE

- 01 Can you trace a reported reduction back to a specific field, practice and season?
- 02 Which crops, regions and acres represent your greatest opportunity, and are your programs reaching them?
- 03 What percentage of your sourced volume is supported by auditable field data rather than estimates?
- 04 Are the practices you fund being implemented, maintained, and reported in a scalable way?
- 05 Which suppliers and farms are driving measurable progress and where are the gaps?

FOR SUPPLIERS

FROM BUYER REQUIREMENT TO FIELD EXECUTION

- 01 Do you know which growers in your network align with each buyer's Scope 3 requirements?
- 02 Which farms have the greatest potential to deliver measurable results?
- 03 How many eligible acres can you activate within the buyer's timeline?
- 04 Where could grower participation or missing field data put delivery at risk?
- 05 Can you show buyers exactly which practices were implemented, where and with what evidence?

WHAT EACH SIDE GAINS

CPGs

Supply visibility
Verified evidence
Execution at scale

SUPPLIERS

Buyer funding
Grower enrollment
Repeatable capability
